

# ***PERSONAL SAFETY TIP***

Ever walk to your car and feel like someone is watching you? Have you ever been woken up in the middle of the night by something you heard? Have you ever been the victim of a crime in one of these situations? And, finally, do you have a vehicle that has a keyless remote?

Why would I ask that last question? Simple: If you have a keyless remote for your vehicle, then you have your own personal alarm system. Have your keys in your hand when walking to or from your vehicle. Also, put your keys next to you when you are in bed. If someone approaches you in a parking lot or tries to break into your home while you are in bed sleeping, all you have to do is hit the alarm on your keyless remote to bring attention to yourself. In most cases, the suspect will run away because they don't want to be seen. If not, it will at least bring attention to you and get eyes turned in your direction which should result in someone coming to your aid.

So, if you have it, why not go ahead and **USE IT!** It's just one more tool you can use to protect yourself from becoming the victim of a crime.
